

Family PACT: Billing Code List – Secondary Core Codes, familypact20 Sexually Transmitted Infection (STI) 1

This section of the Family PACT: Billing Code List identifies the procedure codes to be used for Family PACT Sexually Transmitted Infection (STI) core services described in the *Family PACT: Benefits Package – Services and Procedures [familypact16]* section of this manual.

Secondary core codes are used for all diagnostic laboratory testing and all treatment of STIs, including written prescriptions. These codes are billed with the appropriate ICD-9-CM diagnosis code, together with the appropriate (client's family planning method) Family PACT primary diagnosis code "S" code. For additional information see the *Family PACT: Diagnosis Codes Listings [familypact15]* section in this manual.

Pre-selected CPT-4 codes and HCPCS codes are identified in this section.

Laboratory Services

Laboratory procedures for STI and HIV testing are program benefits available to females and males. For additional information see the *Family PACT: Core Services Overview [familypact11]* section in this manual.

Laboratory procedures designated as screening tests require only a primary diagnosis code.

All screening laboratory tests are listed in the *Family PACT: Billing Code List – Primary Core Codes, Family Planning Method [familypact19]* section of this manual.

Claim Form Completion

HCFA 1500 claim form: Enter the secondary diagnosis in the *Diagnosis or Nature of Illness or Injury* field (Box 21.2).

UB-92 Claim Form: Enter the secondary diagnosis in the *Other Diagnosis Code* field (Boxes 68 – 73).

Note: There must always be a Family PACT primary diagnosis "S" code on all clinician and laboratory claims.

Billing Requirements for Second STI Condition

Providers must submit a separate claim for reimbursable services to treat a second STI condition on the same date of service.

Pharmacy Services

Pharmaceutical treatment is reimbursable. For addition information, see the *Family PACT: Benefits Package Overview [familypact10]* section in this manual.

When applicable, only those dosage regimens included in the current Centers for Disease Control and Prevention (CDC), "Guidelines for the Treatment of Sexually Transmitted Diseases" may be used.
